Education

Mapúa Malayan Colleges Laguna

Bachelor of Science in Information Technology

Cabuyao, Laguna, PH

August 2022 - Present

- Cybersecurity specialization
- Capstone Project: “A Web-Based Security Assessment Tool Using Microcontroller Applied To Unsecured Wifi Access Point In Communal Public Spaces”
- Awards:
 - President’s List Awardee (A. Y. 2022-2023)
 - Dean’s List Awardee (A. Y. 2022-2026)

Holy Rosary College of Santa Rosa, Laguna, Inc.

Senior High School

Santa Rosa, Laguna, PH

Aug 2020 - March 2022

- Science, Technology, Engineering, and Mathematics (STEM) Strand
- Consistent With Honors (A. Y. 2020-2022)

Holy Rosary College of Santa Rosa, Laguna, Inc.

Junior High School

Santa Rosa, Laguna, PH

June 2018 - March 2020

Paco Catholic School

Elementary & Junior High School (Grades 1-8)

Paco, Manila, PH

June 2010 - March 2018

- Consistent With Honors

Project Experience

“Why-Pii” - A Web-Based Security Assessment Tool for Unsecured Public Wi-Fi Networks

- Developed a web-based Wi-Fi security assessment tool using a microcontroller to evaluate vulnerabilities and threats in public Wi-Fi networks
- Designed and implemented the frontend UI and React-based dashboard for security visualization
- Visualized Wi-Fi security scores, vulnerabilities, and threats through a dashboard
- Displayed Wi-Fi scan results and security data through the web application and dashboard

“R-EaseCite” - A Mobile-Based Student Recitation and Record Management System

- Developed frontend UI for a mobile app managing classroom recitations, quizzes, and student participation
- Designed interfaces for managing subjects, students, and questions with CRUD functionality
- Implemented random participant selection and timer-based features for recitation activities

“CareBy” - Mental Health Counseling Appointment System

- Developed frontend interface for a web-based therapy appointment system
- Designed UI for registration, login, and appointment booking as well as authentication features
- Integrated frontend with backend and managed data using Microsoft SQL Server

Console-Based Cryptography Program

- Developed a C# console application for encrypting and decrypting messages using classical ciphers.
- Implemented the console UI flow, including menus, prompts, and user interactions.

- Added multiple encryption methods (Caesar, Monoalphabetic, Kama Sutra, custom cipher).
- Built input validation and applied object-oriented design for maintainable code structure.

CCIS Department Event Enlistment Mobile Application

- Developed an Android app using C# and Xamarin to display multi-day event schedules.
- Built navigation for Day 1-Day 5 event pages and a student profile page.
- Designed clean layouts for event details and user information display.

Kawayan Villas Website Prototype with Data Visualization and Online Booking System

- Designed a high-fidelity Figma prototype for a web-based booking and management system.
- Created UI/UX flows for registration, login, and event booking with scheduling.
- Designed dashboards and interfaces for booking management and data visualization.

Certifications

- Google Cloud Computing Foundations Certificate - Google, February 2026
- CompTIA Tech+ Certification - CompTIA, December 2025
- Ethical Hacker - Cisco Networking Academy, September 2025
- CCNA: Introduction to Networks - Cisco Networking Academy, April 2025

Technical Skills

- **Programming Languages:** Python, C++, C#, JavaScript
- **Frontend:** HTML, CSS, JavaScript, React, Vite
- **Databases:** MySQL, Supabase, Microsoft SQL Server, Oracle, Microsoft Access
- **Tools & Platforms:** Figma, Visual Studio Code, Cisco Packet Tracer, GitHub, Kali Linux, MS Office, Windows Active Directory

Soft Skills

- Problem-solving
- Team collaboration
- Communication
- Time management
- Adaptability
